提供整套解决方案

Zhuanzhong hydraulic press research and development
Provide a complete solution

框式液压机

FRAME HYDRAULIC PRESS

山东众友重工机械有限公司

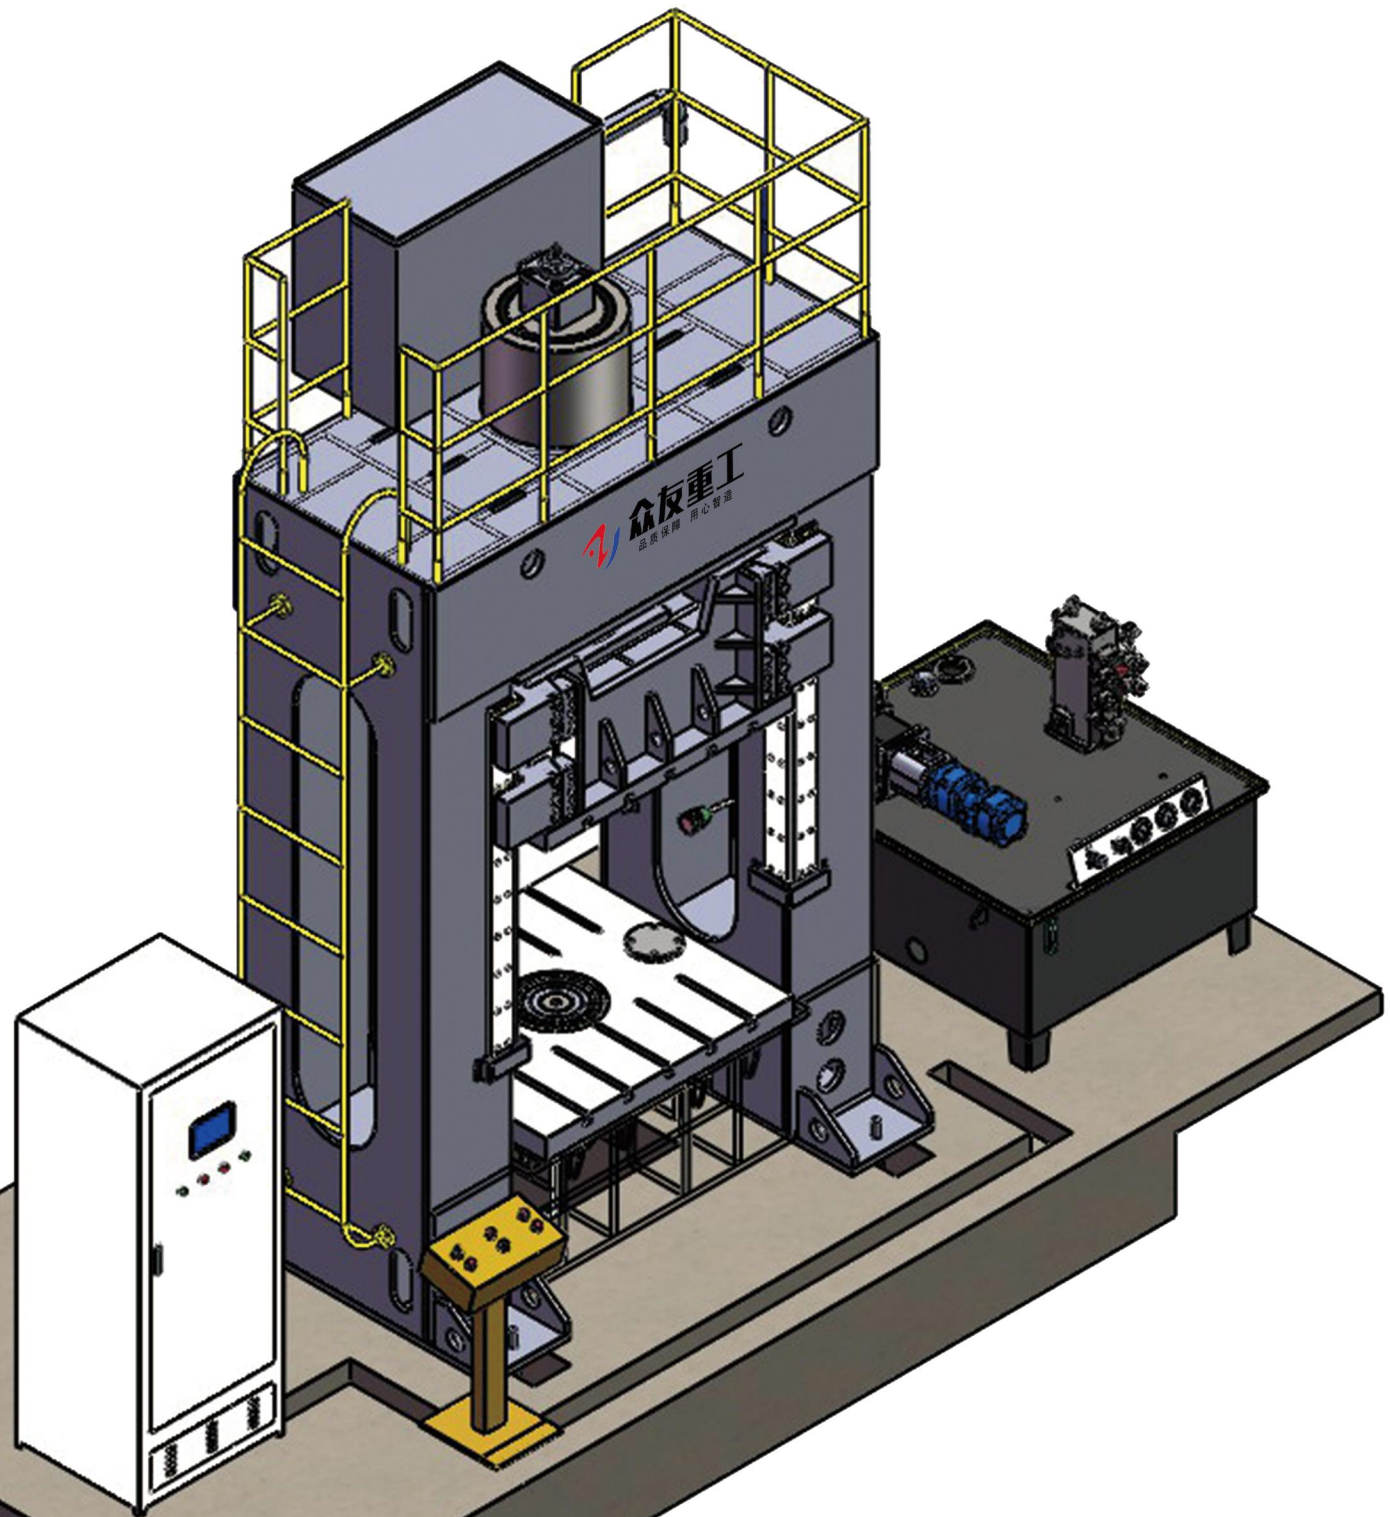

SHANDONG ZHONGYOU HEAVY INDUSTRY MACHINERY CO., LTD

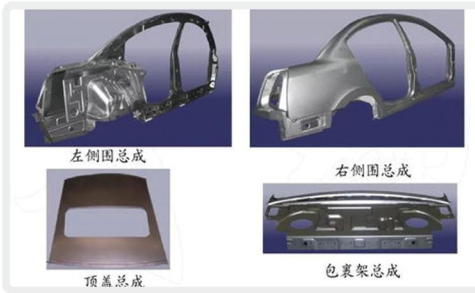

性能特点

- ▶ 机身采用计算机优化设计，全钢板焊接的框架式结构，精度保持性好，液压控制采用插装阀集成系统，工作可靠，流量大，使用寿命长，系统高度集成，减少了连接管路与泄漏点。
- ▶ 采用按钮集中控制，具有调节，手动和半自动(定程单次和定压单次)三种操作方式。
- ▶ 框式采用四角八面导轨，导向精度高，抗偏载能力强，并采用集中润滑。滑块运动速度快，工作效率高。
- ▶ 滑块工作压力，空载快速下行和慢速工进的行程范围均可根据工艺需要进行调整。

Performance characteristics

- ▶ The machine body adopts computer optimized design, the frame structure of all steel plate welding, good precision retention, hydraulic control adopts cartridge valve integrated system, reliable work, flow large volume, long service life, highly integrated system, reducing connecting pipelines and leakage points.
- ▶ It adopts button centralized control and has three operation modes: adjustment, manual and semi-automatic.
- ▶ The frame type adopts four-corner and eight-sided guide rails, which have high guiding precision, strong anti-eccentric load capacity, and centralized lubrication. The slider moves fast and the work efficiency is high.
- ▶ The working pressure of the slider, the stroke range of no-load fast down and slow work can be adjusted according to the process requirements.

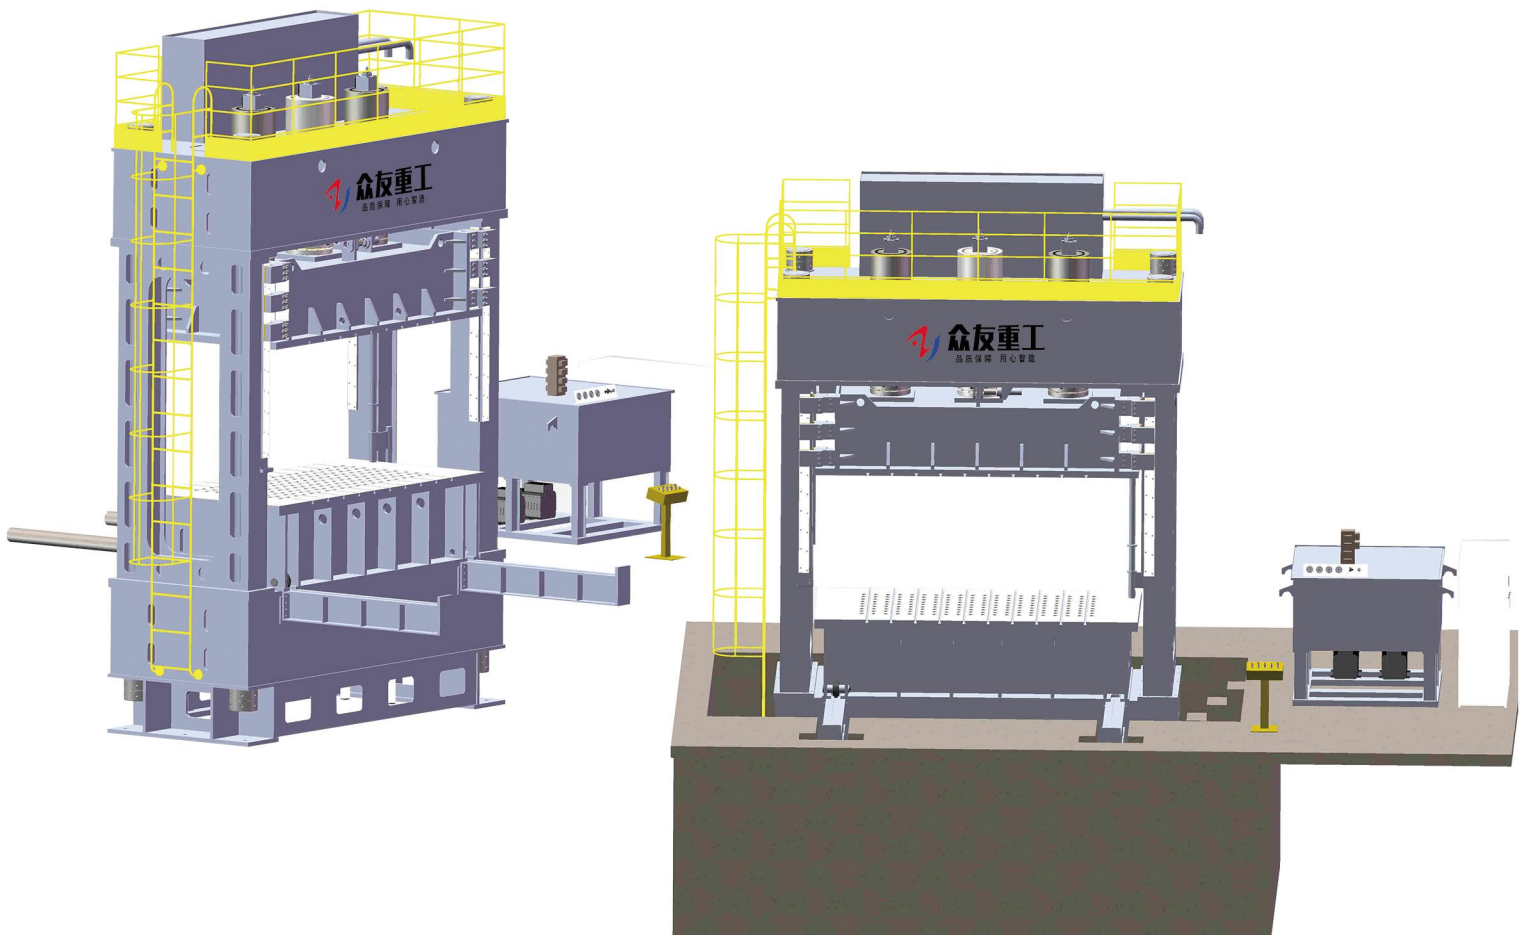

压制工艺

框架式压制成型液压机适用于金属或非金属零件的压印、成形、浅拉伸、整形、覆模及切边等；可压制的典型产品有表壳、表带、眼镜框架及零件、像框、餐具、标牌、锁具、五金零件等。

Frame type press forming hydraulic press is suitable for embossing, forming, shallow stretching, shaping, overmoulding and edge cutting of metal or non-metal parts;

Typical products that can be pressed include watch cases, watch bands, spectacle frames and parts, picture frames, tableware, labels, locks, hardware parts, etc.
