# 拉伸液压机

STRETCHING HYDRAULIC PRESS

## 压制产品

Pressed product

拉伸液压机主要用于金属厚、薄板拉深和落料、冲裁等成型工艺，同时也具有通用液压机的常规功能，用途较为广泛。在带有液压缓冲器条件下可完成拉深后再冲裁工艺或冲裁后翻边工艺，广泛应用于汽车、摩托车、家电、石油化工、轨道交通、航天航空等各个领域。

Tensile hydraulic press is mainly used for metal thick, thin plate deep-drawing and drop, punching and other molding processes, but also has the conventional functions of the general hydraulic press, the use of a wider range. With hydraulic buffer conditions can be completed after deep drawing and then blanking process or blanking after flanging process, widely used in automobiles, motorcycles, household appliances, petrochemical industry, rail transportation, aerospace and aviation and other fields.

## 可选配附件

- ▶ 移动工作台
- ▶ 冲裁缓冲装置
- ▶ 光电保护装置
- ▶ 打料装置
- ▶ PLC可编程控制器
- ▶ 模具加热及温控装置
- ▶ 触摸式显示屏
- ▶ 液压系统加热冷却装置
- ▶ 行程、压力。数显、数控装置
- ▶ 打料装置, 压边滑块, 液压垫四角分别调压装置

## OPTIONAL ACCESSORIES

- ▶ Movable worktable
- ▶ Punching buffer device
- ▶ Light curtains
- ▶ Knock down cylinder
- ▶ PLC controller
- ▶ Mould heating and temperature control
- ▶ Display screen
- ▶ Hydraulic system heating/cooling device
- ▶ Stroke, pressure display/ control device
- ▶ Knock down device, Crimping slider, four corners of the hydraulic cushion pressure regulating device
